

Dry eye diagnostic system

Platform for Comprehensive Ocular Surface Examination

Dry eye diagnosis/Anterior segment photography/Lens fitting/
Patient management/Telemedicine

Guided examination: providing a comprehensive report covering 10 dry eye diagnosis.
Non-invasive examination, Quantitative data.

Full-automatic Firefly digital module, easy operation without parameter settings.
High quality optics and built-in yellow filter efficiently increase the accuracy of lens fitting.

Professional 1/2.5-inch sensor and 1.55 μm pixel, real-time playing and storage.
Smart patient management system, DICOM supported.

Corneal Fluorescein Staining

Fluorescein Breakup Time

Non-Invasive Breakup Time

Conjunctival
Hyperemia Analysis

Meibomian Glands
Function Evaluation

Non-Invasive Tear
Meniscus Height

Lipid Layer Thickness

Blink quality

Eyelid Margin

Easy Pathogenic Diagnosis provides guidance for customized treatment.

Dry eye diagnostic system

Automatic Analyzing Meibomian Glands

Precise diagnosis of Dry Eye caused by MGD is guaranteed with the help of AI identification system. Unique Built-in infrared lighting system provides a larger scope capture of Meibomian Glands, adjustable depth of field and aperture enables more vivid images.

Increase Positive Rate of Early Corneal Epithelial Staining

Built-in yellow filter along with cobalt-blue filter increases the contrast of Sodium Fluorescein Staining image.

HD Optical System

Resolution is up to $2700 \cdot N \text{ lp/mm}$ (200 lp/mm), providing more details of the pathologies.

Full Cornea Dry Eye Analysis

By Placido ring projection system with visible light, the examination scope is up to 8 mm cornea diameter. Examination of the tear film outside of pupil center has the same significance for the diagnosis of Dry Eye.

Fully automatic Firefly digital module

Firefly Digital module is specially designed for anterior segment examination, no parameter settings required (automatic exposure, auto white balance, auto focus), with adjustable depth of field and wide dynamic range, 12 Mega Pixels video output, high examination efficiency is allowed.

Due to various causes of Dry Eye Disease, traditional examination is difficult to find out the cause and quantify for the diagnosis. MediWorks Dry Eye Diagnostic System can provide standardized examination and quantified causes evaluation for Dry Eye Disease.

Dry eye classification from the 2007 DEWS Report

Dry Eye Questionnaire

Ocular Surface Disease Index (OSDI)/McMonnies/SPEED/DEQ 5

Ocular Surface Disease Index[®](OSDI)[®]

Have you experienced any of the following during the last week?

1. Eyes that are sensitive to light?

All of the time Most of the time Half of the time Some of the time None of the time

2. Eyes that feel gritty?

All of the time Most of the time Half of the time Some of the time None of the time

3. Painful or sore eyes?

All of the time Most of the time Half of the time Some of the time None of the time

4. Blurred vision?

All of the time Most of the time Half of the time Some of the time None of the time

5. Poor vision?

All of the time Most of the time Half of the time Some of the time None of the time

limited you in performing any of the following during the last week?

OSDI Questionnaire Export PDF Report Print Submit Total Score: Grade Description

The built-in dry eye questionnaire is designed according to the risk factors and clinical characteristics of dry eye, providing a simple preliminary assessment for dry eye, improving diagnosis and treatment efficiency and facilitating patient follow-up.

Non-Invasive Tear Meniscus Height

Normal: $\geq 0.2 \text{ mm}$

AI identification system depicts Tear Meniscus area and measures the tear height automatically. Evaluate tear secretion amount and continuity objectively. More efficient and less irritation compared with the traditional Schirmer's test.

Insufficient tear secretion

Abnormal dynamics and conjunctival chalasis

Non-Invasive Breakup Time

Fluorescein Breakup Time

Meibomian Glands Function Evaluation

Get original/enhanced/result images by one click

AI identification system automatically analyzes meibomian glands loss caused by meibomian glands dysfunction with precise and quantified diagnosis results.

Built-in infrared lighting system helps doctors obtain larger image scope of the meibomian glands.

Adjustable depth of field makes the glands more prominent and distinguishable against the background.

Grade 0: No Meibomian Glands Loss
Grade 1: Meibomian Glands Loss < 1/3
Grade 2: Meibomian Glands Loss 1/3 ~ 2/3
Grade 3: Meibomian Glands Loss > 2/3

Meibomian glands loss

Image of Meibomian Glands under high-magnification

Lipid Layer Thickness

White ring projection system ensures a larger examination area compared to Placido ring. By comparing with the standard grading template and recording the Lipid Layer thickness, it is helpful for judging MGD.

(Unit: nm)

- Grade 1: <30
- Grade 2: 30 ~ 60
- Grade 3: 60 ~ 80
- Grade 4: >80

Eyelid Margin

1. Normal including (Ophthalmic embolism bright, transparent)
2. Mild including (gland cap crown - glandular prominent)
3. Moderate including (glandular fat plug - disappearance of the marginal mucosa, hyperkeratosis)
4. Severe including (uneven margins, disappearance of the meibomian glands - posterior margin Blunt round, thickening, new blood)

Meibomian Glands obstruction

MediWorks professional design of optical system is capable of providing HD digital image that remains clear and sharp even zoom in, meets the examination requirements of the overall shape of eyelid margin and its slight change.

Analysis of Conjunctival Hyperemia

AI image

Normal: ≤ 2 Abnormal: > 2

The unique AI identification system can identify and calculate percentages of conjunctival congestion and ciliary congestions and evaluate severity of eye congestion.

Blink quality

Automatically analyze blink times, average blink interval, complete blink times and incomplete blink rate.

Corneal Fluorescein Staining

Effectively increases positive rate of early corneal epithelial staining.
Built-in yellow filter along with cobalt-blue filter makes the corneal fluorescein staining images more clearly.

Dry Eye Comprehensive Evaluation Report

Smart Patient Management system

Comparison of Patient records

Supports repeated comparison among medical records to evaluate treatment and guide customized treatment plan.

Patient Management system allows doctors to build and edit medical records. Quickly search the patient case by key words. Doctors can note patients' situation via the software. This DICOM-supported system enables Mediview to connect with medical systems in hospitals.

We are looking forward to your professional advice for our products and if you are interested in academic or business cooperation with us.

Specifications

Microscope

Microscope Type	Galilean Type
Magnification Change	Revolving Drum 5 steps
Total Magnification	6.3 x, 10 x, 16 x, 25 x, 40 x
Optical Resolution	2700·N lp/mm (200 lp/mm)
Eyepieces	12.5 x
Angle between Eyepieces	10°
Pupillary Adjustment	52 mm ~ 80 mm
Diopter Adjustment	- 8 D ~ + 8 D
Field of View	Ø36.2 mm, Ø22.3 mm, Ø14 mm, Ø8.9 mm, Ø5.7 mm

Slit Illumination

Slit Width	0 ~ 14 mm continuous (slit becomes a circle at 14 mm)
Slit Length	1 ~ 14 mm continuous
Aperture Diameters	Ø14 mm, Ø10 mm, Ø5 mm, Ø3 mm, Ø2 mm, Ø1 mm, Ø0.2 mm
Slit Angle	0° ~ 180°
Slit Inclination	5°, 10°, 15°, 20°
Filters	Heat-absorbing filter, ND filter, Red-free filter, Cobalt blue filter, Built-in yellow filter, Amber filter (optional)
Lamp	LED
Luminance	≥ 150 klx

Power Supply

Input Voltage	~100V ~ 240V
Input Frequency	50 Hz / 60 Hz
Rated current	1.2 A
Output Voltage	LED 3 V, Fixation 15 V

Packaging

Dimension	740 mm x 450 mm x 530 mm(L/W/H)
Gross weight	23 kg
Net weight	17 kg

System Specifications

Digital Module	Automatic exposure / Automatic white balance / Adjustable depth of field and aperture
Image Sensor	1/2.5 - inch sensor / 1.55 µm pixel / 12 M Pixels
Photo Resolution	4056 x 3040
Format	JPEG
Video Resolution	2592 x 1944
Frame of Video	30 fps
Video Formats	MP4 H.264
Exposure Mode	Automatic exposure
Transmission Interface	USB

Computer Specifications

PC Configuration	i5 - 10500T 8GB memory 256GB SSD + 1TB storage
Display	1920 × 1080 23.8 inch
PC System	Windows 10
